PROFILE

Informatics Engineering student focused on Front-End Development, with hands-on experience building responsive web and mobile applications using JavaScript, TypeScript, and React. Interested in building accessible, user-focused interfaces and seeking a Front-End Developer Internship.

PROFESSIONAL EXPERIENCE

Mindset, *Front-End Developer Intern* 12/2024 | Remote

- Developed a responsive task-management web application using HTML, CSS, and JavaScript as part of a collaborative development team.
- Designed a complete UI/UX prototype for a job application platform named “Jobzy” using Figma as a solo project, focusing on intuitive design for job seekers in the Middle East.
- Developed a collaborative To-Do List web application with a team as our final project, using HTML, CSS, and JavaScript.
- Focused on clean UI, task management functionality, and responsive design.

Freelance, *Python Tutor* 2023 – 2024 | Aden, Yemen

- Taught Python to over 20 students with custom lesson plans and exercises.
- Helped beginners build logic and solve coding problems.

Queen Institute, *English Teacher* 02/2023 – 08/2023 | Aden, Yemen

- Delivered foundational English classes focusing on pronunciation and fluency.
- Successfully taught over 50 students.

EDUCATION

Nusa Putra University, *BSc in Informatics Engineering* 2023 – 2027 | Sukabumi, Indonesia

Aden Model High School, *High School Diploma* 2017 – 2020 | Aden, Yemen

SKILLS

Languages
- JavaScript
- TypeScript
- Python
- HTML5
- CSS3

Frameworks

CERTIFICATES

Responsive Web Design Developer Certification
freeCodeCamp | May 10, 2025
Completed 300+ hours covering HTML, CSS, Flexbox, CSS Grid, and responsive design principles.

International AI & Deep Learning Bootcamp 2026
Indonesian Artificial Neural Network Society (IdNNS) | July 17, 2026
Participated in the International AI & Deep Learning Bootcamp 2026, gaining exposure to artificial intelligence and deep learning concepts.

Python Developer Certificate
SoloLearn | May 30, 2024
Completed foundational and practical training in Python programming, covering logic building, functions, and problem solving.

AWARDS

3rd Place Winner – International Robosport Tournament 27/06/2025
FIRA Indonesia / Indonesian Robotics Association
Built and tested autonomous car control algorithms using AVIS Engine and Python, supporting real-time navigation, obstacle avoidance, and performance analysis.

PROJECTS

Music Recommendation System — Research Project ,
JavaScript, HTML, CSS, Recommendation System, Vercel
Developed a web-based music recommendation system using content-based filtering and weighted cosine similarity to generate personalized song recommendations based on user preferences. Designed an interactive interface with mood, activity, and audio-feature inputs and deployed the application on Vercel.

Food Delivery App , *React Native Project*
Built a full-featured mobile food delivery app using React Native (Expo) and TypeScript, with Appwrite for authentication and backend integration, a dynamic cart powered by Zustand for real-time state management, reusable responsive UI components built with NativeWind, and search plus category filtering to enhance user experience.

To-Do List Website , *Team Web Project (HTML, CSS, JavaScript)*
Developed a collaborative To-Do List web application as our final graduation project using HTML, CSS, and JavaScript, focused on task creation, completion tracking, responsive layout, and clean user interface.

Online Shopping Website , *Front-End Project*
Developed a fully responsive online shopping interface using HTML, CSS, and JavaScript. Implemented product listing UI, interactive components, hover effects, and a clean modern layout. Deployed using Netlify for live access.
